

ECED 4260 IC Design and Fabrication

Tutorial B: ModelSim Simulator

Tutorial Material:

- Intel Tutorial: **Using the ModelSim_Intel FPGA Simulator by Drawing Waveforms**

The screen captures in the tutorial were obtained using the version 18.0. Your version of the software may be slightly different.

- If there is any window missing during the tutorial, use the drop-down menu under the **“View”** in the top left corner to add the corresponding window.

Submissions after the tutorial:

- **HDL codes** and **waveforms** from each section.

Please combine the required items into **one file** (pdf preferred) and submit it into Brightspace.
